[Clinical Research](#)

[Ontario Graduate Certificate](#)

[Program Code: 07681](#)

[Campus: Online](#)

[Length: 3 semesters](#)

Humber's Clinical Research graduate certificate program prepares graduates with the transferable skills needed to build successful careers in the health sciences.

There is an emphasis on maintaining good clinical practice (GCP) as presented by the International Conference on Harmonization of Technical Requirements for Registration of Pharmaceuticals.

Teamwork and communication skills are reinforced throughout the program, and you will acquire the necessary technological skills to succeed in the workplace.

You will also benefit from:

- a unique integrated approach

- acquiring a recognized skillset applicable to a wide variety of employment opportunities

- integrative project work that links applied and academic fields

- learning to adapt to the changing field and staying current

- simulation trials mimicking real work experiences

Program Delivery: Courses are scheduled over two 14-week semesters, and are asynchronous, self-directed online modules, with live synchronous sessions.

This program is not available to international applicants.

Following two online academic semesters, students complete a three-month (450 hours) field experience that provides opportunities to apply their learning in a real-world setting.

During Semester 3, students complete their learning at field experience sites, and assessments are carried out by assigned supervisors.
